

Water specification

	Specifications Kialoa
Total salt content	100 – 200 mg/L (100 – 200 ppm)
Conductivity	150 – 350 uS/cm
Total hardness	4 – 8 °dH
Carbonate hardness	3 – 6 °dH
ph-value	6,5 - 7,5
Copper	<0,5mg/L
Alkalinity	40 - 70 ppm

During installation, our service technician will test your water and install a suitable water filter as well as a meter. Please check the meter regularly so that a used filter can be replaced in time! The display counts down: when it reaches 0, the liter capacity has been reached; when the display flashes, the expiration date (1 year) has been reached.
