## BEAUTIFUL UNDER-COUNTER COFFEE EQUIPMENT

---

**C**reate a space where design and efficiency work together for an unprecedented experience in your location. Be creative and make your space iconic: you can now shape the workflow that fits your space and your vision best. Mix and match espresso, steam and pour-over as combined or stand-alone stations.

-

**Be creative  
and make your space  
iconic**

-

Modbar allows you to have the entire coffee preparation experience on display. Opening up the bar gives baristas the ability to focus on what really matters: taking care of customers and responding to the demand of quality – in the cup, in the setting, in the relationship.

modbar®

**S**electing Modbar is one in a series of critical design decisions that can be made to bring a stunning space together. Always leave some space free under the counter to place the individual operating modules. Always bear in mind you need to think about placement and location for: grinder, cup warmer, knock box, rinser/sink, hot water solution. Modbar's mission is to provide visionaries the tools they need to create unique and exceptional spaces and experiences, while challenging the status quo. Every Modbar is special and unique.
