BASIC CONFIGURATIONS CONFIGURAZIONI STANDARD

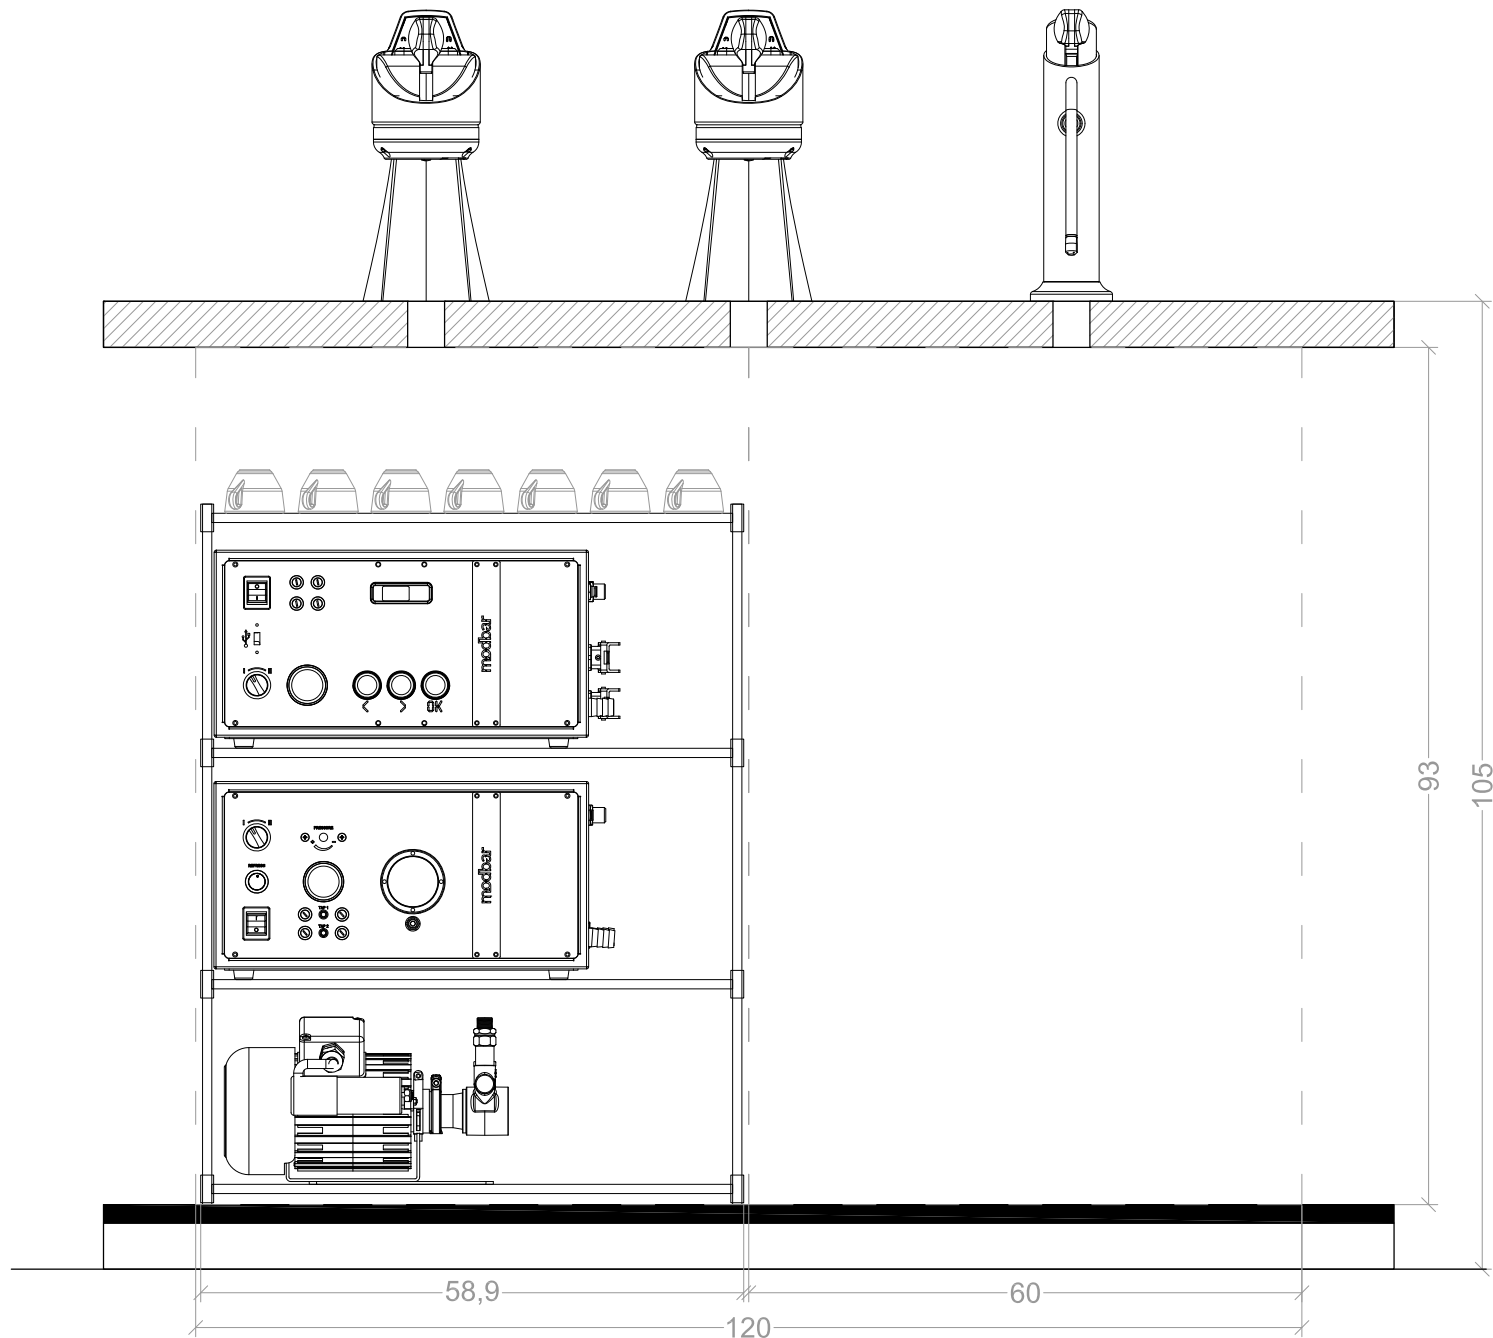

With Modbar you can design your workstation in any way you like it. However, in this document you will find some of the basic configurations you can use for your actual space or just as an inspiration for it. For each of these configurations you will find a recommended version, where the distance between taps and modules is minimized, but also a simplified version for which you can use standard wire racks to place the modules. Please note, when designing the working area, it must be considered the placement and positioning for: grinder, cup warmer, knock box, rinser, sink and hot water solution.

Con Modbar puoi progettare il tuo spazio in qualunque modo. Tuttavia, in questo documento puoi trovare alcune delle configurazioni standard per il tuo locale o che puoi usare come ispirazione. Per ciascuna di queste configurazioni troverai una versione ottimale, ovvero con distanza minima tra moduli e tap, ma anche una versione semplificata che utilizza delle scaffalature in metallo standard per i moduli stessi. Nell'area di lavoro si dovranno considerare allestimenti e spazi per: macinadosatore, battifondi, soluzione scaldatasse ed acqua calda, rubinetto e lavabicchieri.
