Open the
La Marzocco
home mobile app
from your device

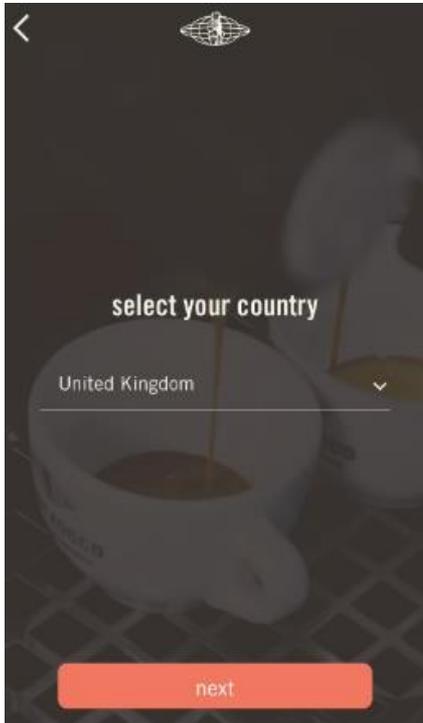

Log in by either
entering your e-
mail and password
or through your
Facebook account.

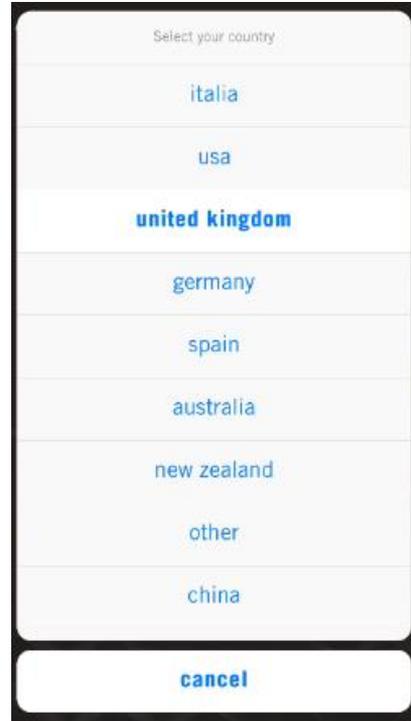

If you don't have
an account hit the
"sign up" icon at
the bottom of the
screen.

sign in & pairing

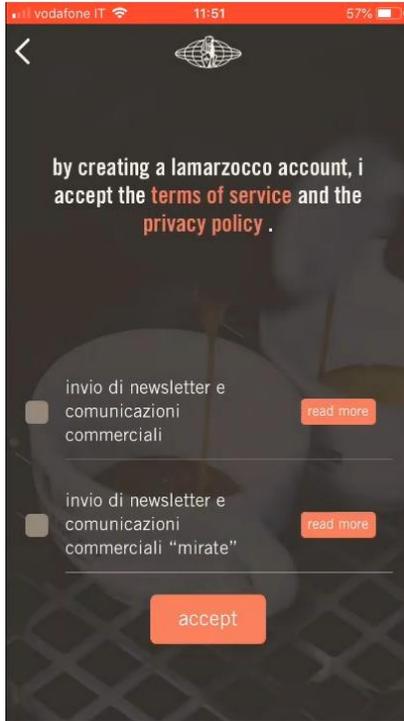

Select your country from the pop-up list.

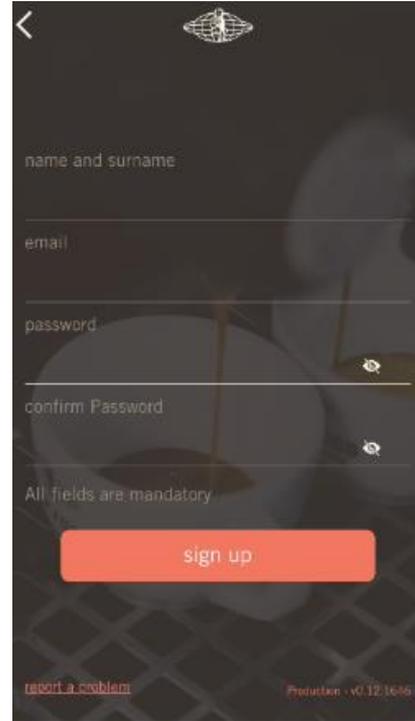

If your country is not listed, please select "other".

sign in & pairing

Tick the newsletter & offers box to receive news and important information about the La Marzocco products and the application.

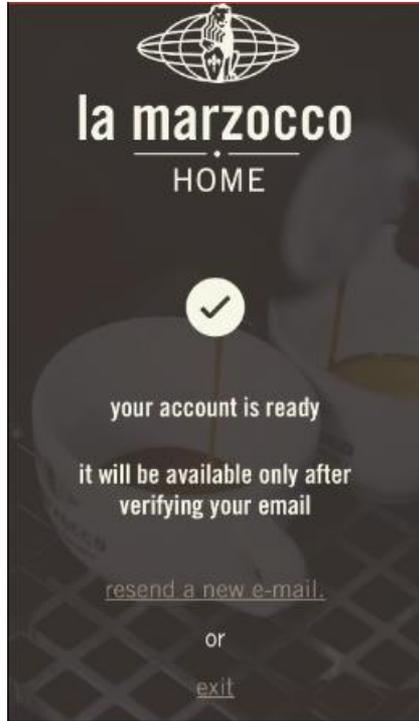

Please fill the field with:

- full name
- e-mail
- password

you can always check your password with the “eye” icon.

sign in & pairing

Once you have submitted your request for an account, check your email to confirm the address in order to start using the application.

Allow the server some time to process your request.

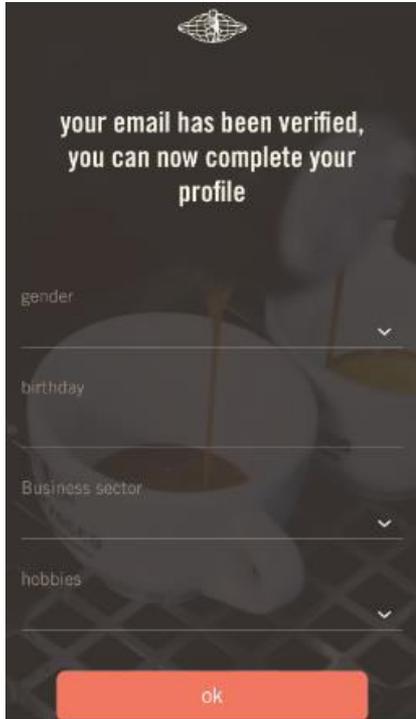

If you are unable to find the confirmation mail in either your inbox or spam folder, hit the “resend a new e-mail” at the bottom of the screen in the La Marzocco Mobile Home App.

Nb: the previous email will not be valid the moment the new confirmation mail is sent.

sign in & pairing

Complete your profile by entering the requested information, then hit "ok"

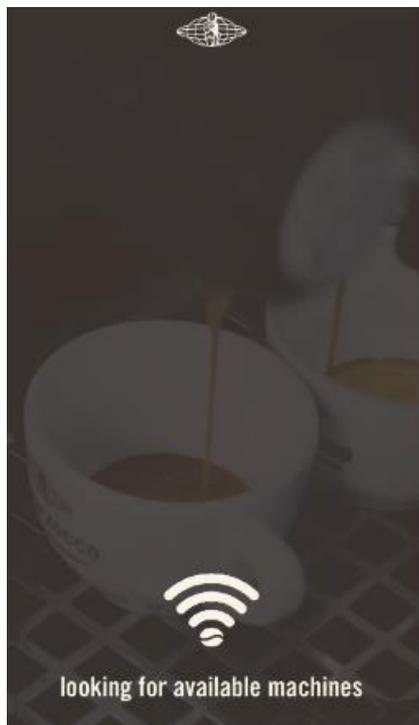

Select your machine model.

sign in & pairing

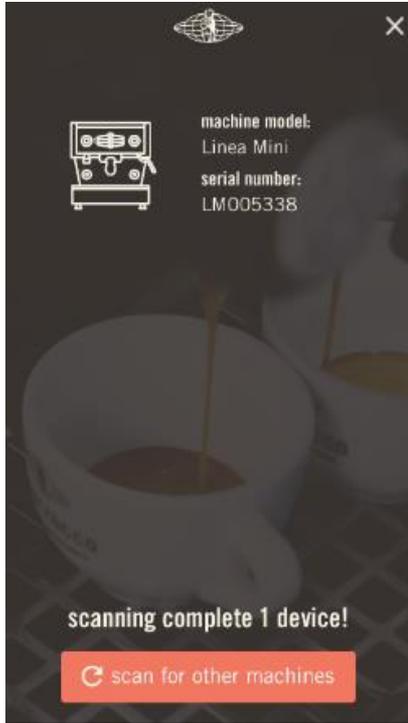

Follow the instructions shown in the application.

Allow the app few moments to establish a connection with your machine.

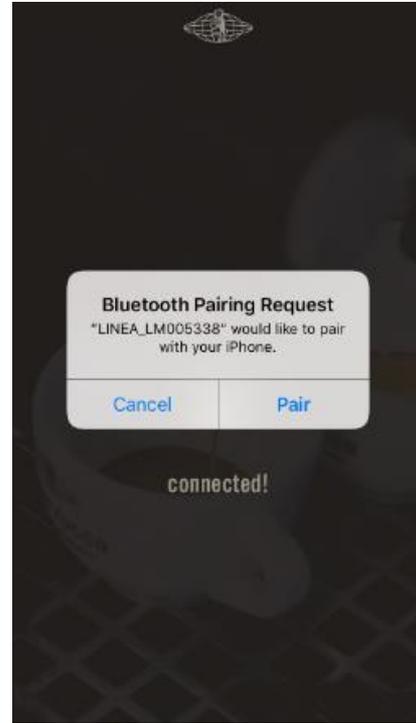

sign in & pairing

Confirm which machine you are trying to connect to.

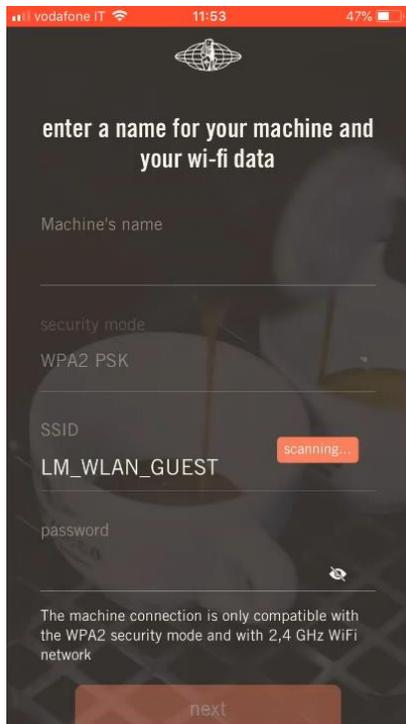

In case of multiple machines found, it is possible to identify the correct one by looking at the serial number shown on the screen.

Allow the Bluetooth pairing.

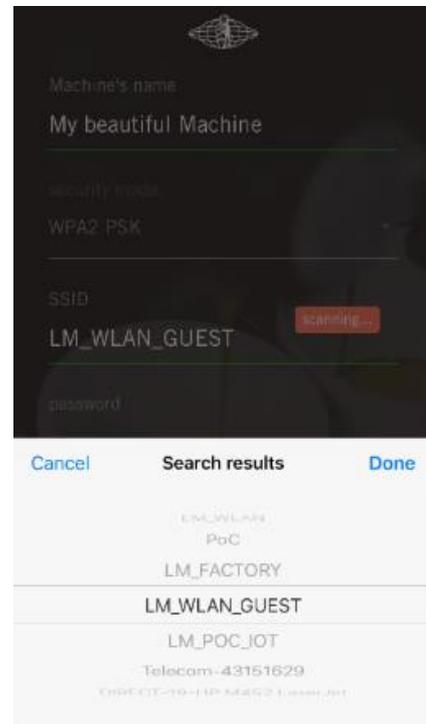

sign in & pairing

Enter a name for your machine and select the local wifi network you will be using for both the machine and your phone then enter the password for the network .

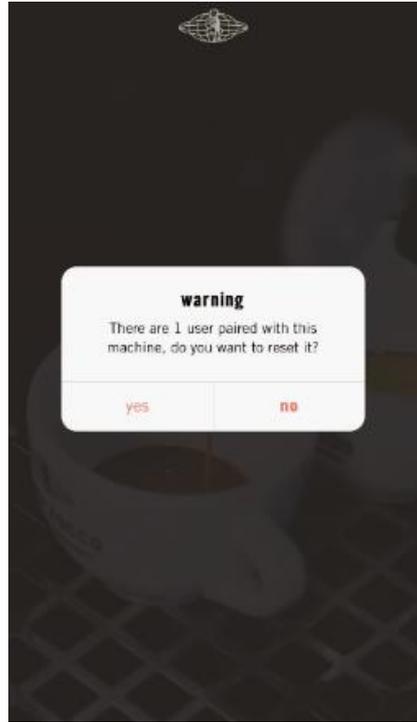

Nb: the mobile phone has to be on the same network of the machine in order to connect.

If the network used is not your preferred network it is possible to choose a different network by clicking “SSID”.

sign in & pairing

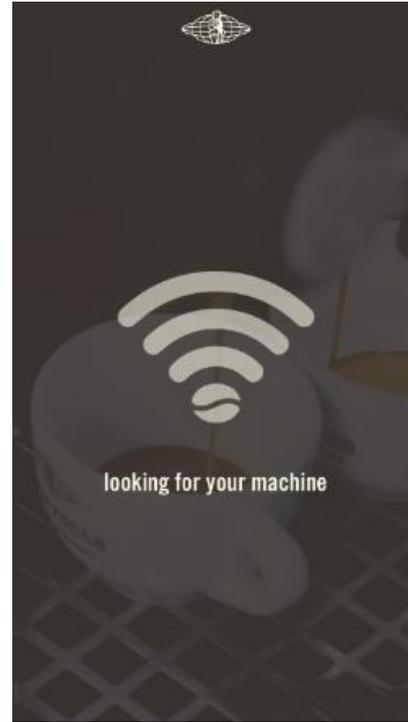

You now have the option to remove previous machine users or not.

If you choose "yes" all previous users will need to re-register the machine in order to use the app with this machine.

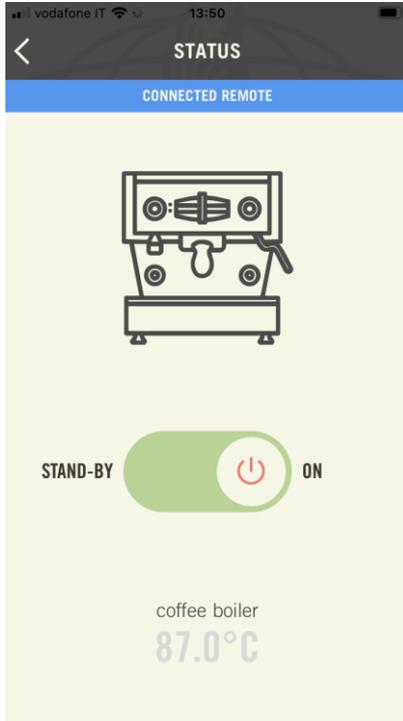

If you choose "no", all previous users will still be able to access the machine using the app

Allow the app few moments to access your machine.

sign in & pairing

When you connect to your machine and the blue line of the remote connection comes up, that means that your phone and your machine are on different networks.

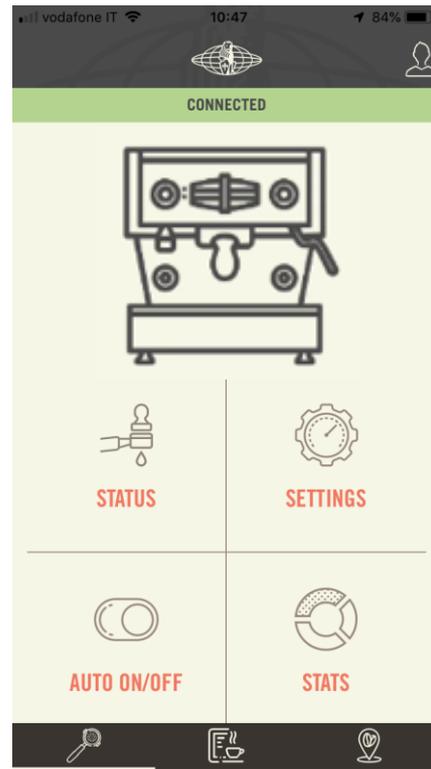

In this mode, you can only activate/deactivate the stand-by mode and see the machine's settings but not modify them.

Just change your phone's network to match the one set on the machine to fully access the app functionalities.

remote connection

WELCOME TO THE HOME PAGE OF THE APP!

Now your device is paired with your machine.

In the home page it is possible to access the status, settings and statistics of your machine.

Tutorial, news & tips and FAQ sections are also available.

Tutorial, news & FAQ

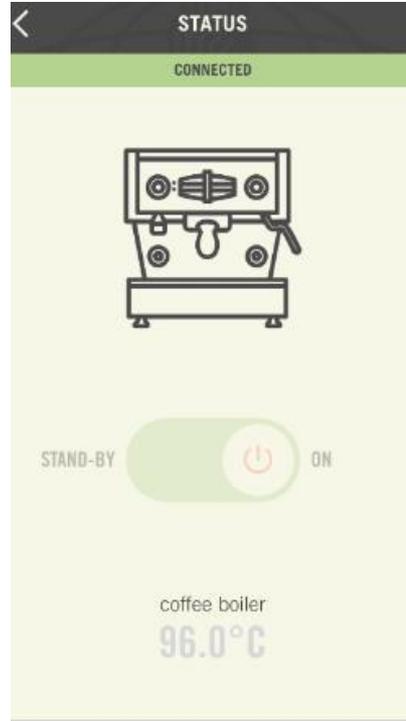

Geolocation

app features

By clicking on “status” you will be able to access the status display.

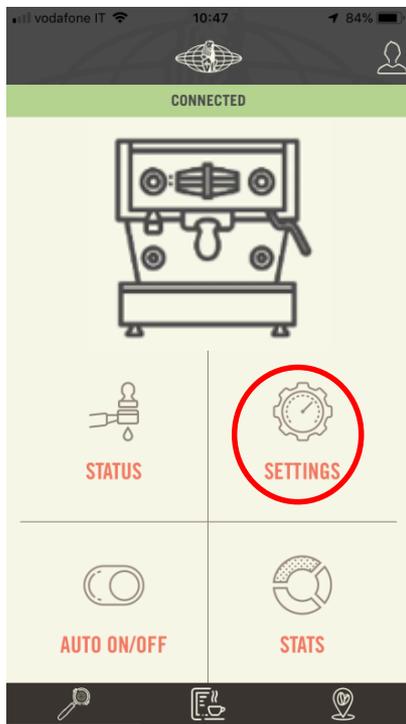

In the status display, it is possible to select the stand-by mode and to view the boiler temperature.

The stand-by mode puts the machine in stand-by after 30 minutes of inactivity. This feature is required to comply with the newest regulations about power consumption and can be disabled in the setting menu.

app features

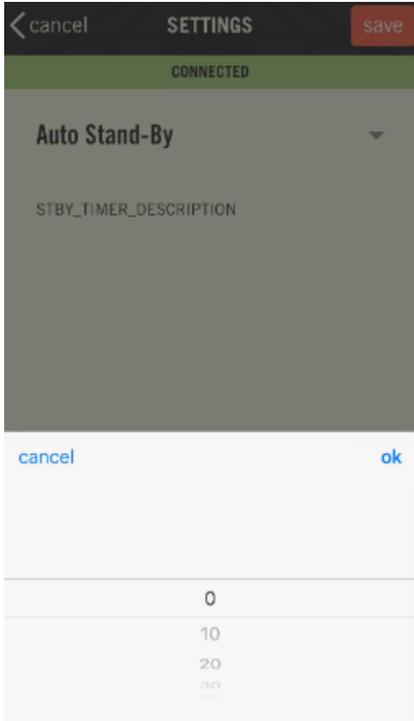

Clicking on the setting you can access the machine parameters menu.

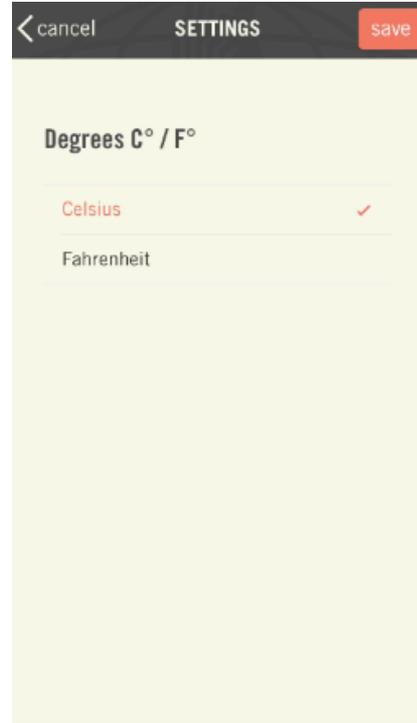

app features

In the auto stand-by section, you can select the amount of time after which the machine will go in stand-by mode.

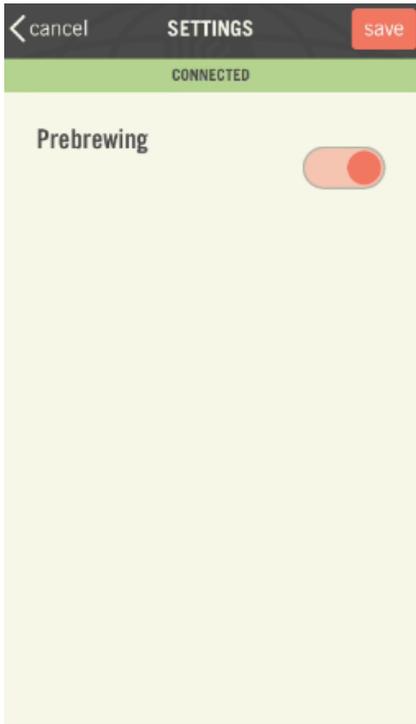

In the degrees menu, it is possible to select the temperature unit.

Nb: after any changes, click the icon "save" to make them effective.

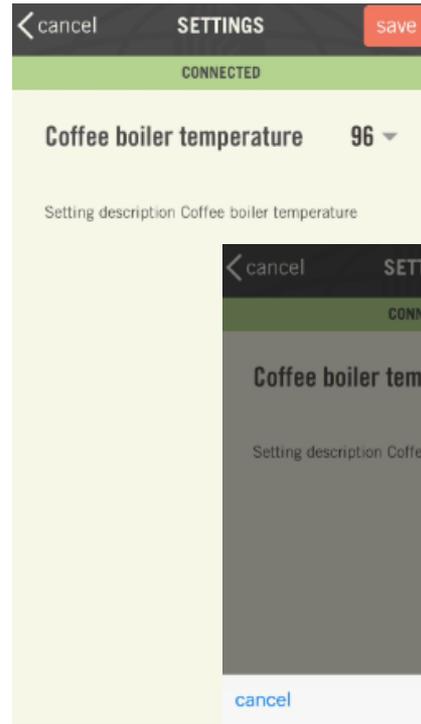

app features

You can also decide to enable or disable the prebrewing mode.

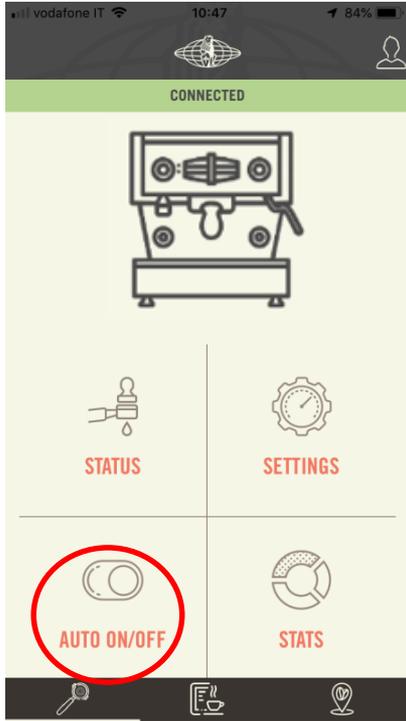

Pre-brewing allows to wet the coffee puck by opening the valve for a certain time (pre-brewing ON) and wait with the valve closed (pre-brewing OFF) before starting the extraction

and select the exact coffee boiler temperature.

app features

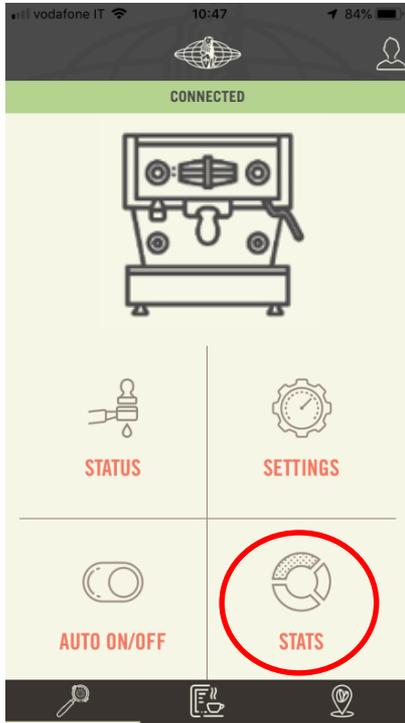

Click on the auto on/off icon to personalise when your machine automatically will turn on/off.

You can fully customise the time of the auto on/off.

app features

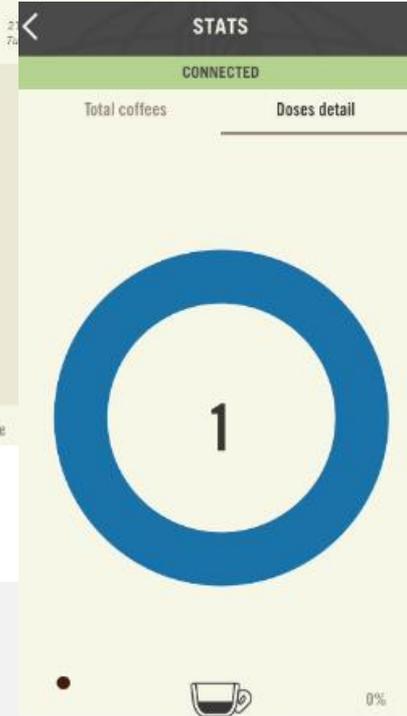

Click on the “stats” icon to access some detailed information about your coffee extractions.

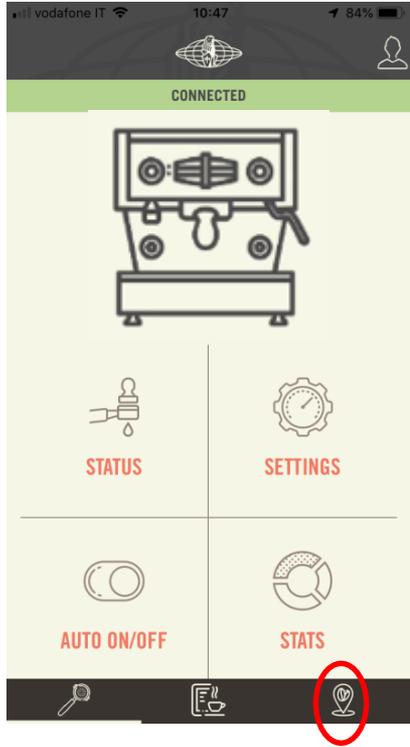

You can access statistics on how many coffees have been brewed and on doses details.

app features

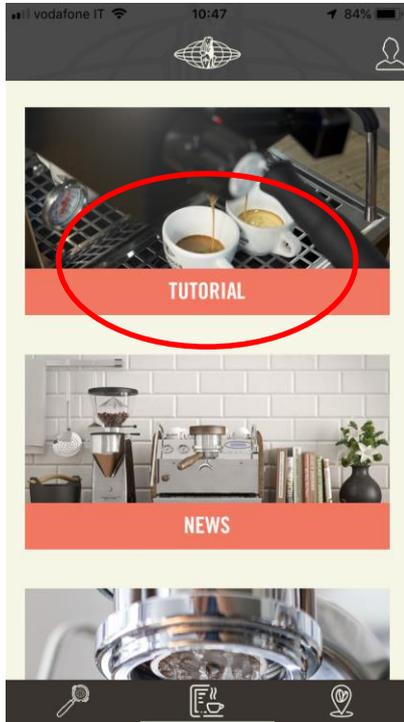

Click on the geolocation icon at the bottom right of the screen to discover the nearest La Marzocco office.

app features

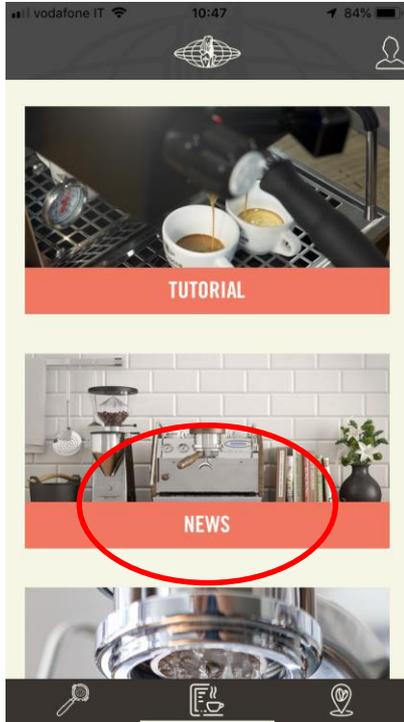

In the tutorial section you will find a variety of topics. from “how to make espresso” to “latte art”

tutorials & faq

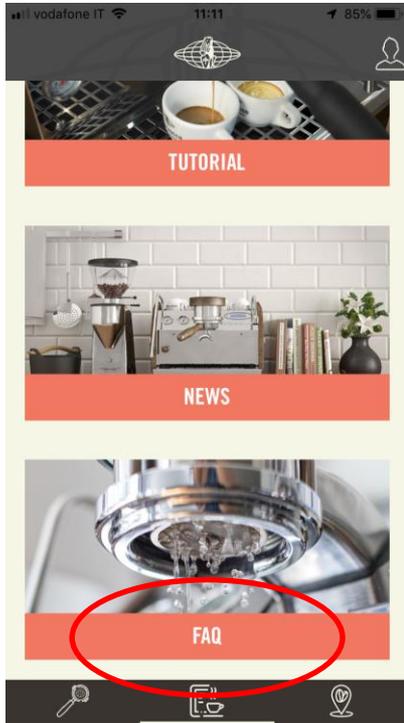

In the news section you can find all the news related to the coffee world.

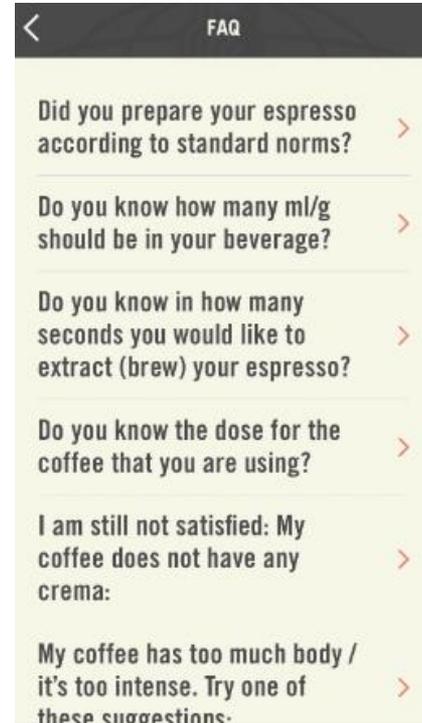

tutorials & faq

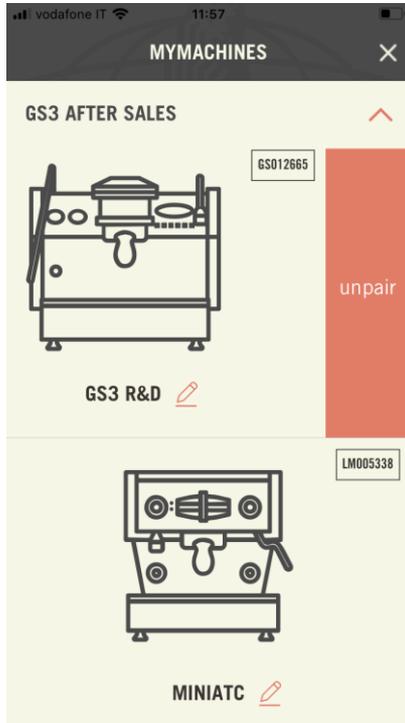

In the faq section are listed the most common questions about coffee and your coffee machines.

tutorials & faq

If you want to unpair a machine you can do it from the machine's list by swiping to the left on the machine you want to unpair.

You can use this procedure if you have realised that you input a wrong Wi-Fi password and, as a result, the machine is not able to connect to the internet showing the red label of “no connection”

You can access the machine's list by hitting the circumflex  in the top right of the App home page.
