FAST

MOZZAFIATO

FAST

The new Mozzafiato (meaning “*Breathtaking*” in English) marks the stylistic and functional evolution of a machine that reflects Rocket’s passion for design, coffee, and cycling. With its new features and functionalities, this machine is perfect for creating a unique home coffee experience.

Finely designed to heat up quickly, ensuring the new model is ready to brew in a remarkably shorter time.

Every detail of the new Mozzafiato has been meticulously planned. In collaboration with the designer Valerio Cometti+V12 Design, we have optimised the dimensions of the Mozzafiato to enhance usability, achieving perfect proportions and a ‘stance’ that exudes both solidity and quality.

ALSO A DESIRE FOR
CAREFREEDNESS AND
ADVENTURE, MAYBE
EVEN AS FAR AS THE
PLACES WHERE THE
COFFEE COMES FROM.**

DESIGN PHILOSOPHY

The Mozzafiato range draws inspiration from an unexpected yet unique source: iconic vehicle roof rails from the past. Its die-cast sides highlight the exceptional build quality, with shapes and forms inspired by legendary vehicles such as the 1980s Volvo station wagons and renowned off-roaders like the Land Rover Defender and Toyota Land Cruiser.

The heart of the machine

The new group head, which first appeared in the Appartamento TCA line, integrates seamlessly with the sharp lines of the new Mozzafiato body, creating a cohesive design philosophy.

Form and function

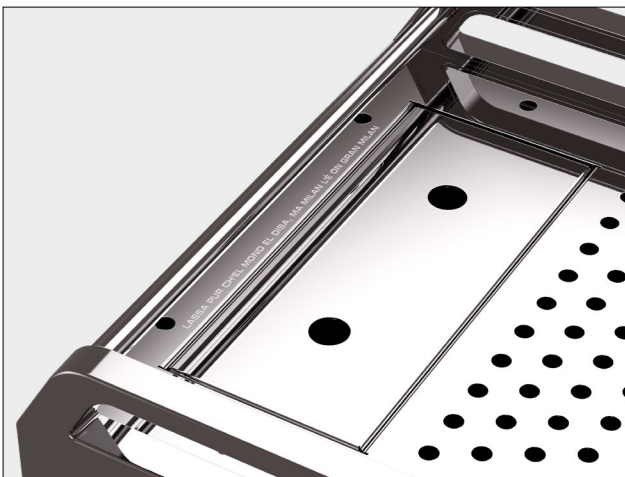

As with all Rocket machines, the work area is ergonomically designed to accommodate the barista's natural movements, ensuring a perfect blend of form and function.

Display and double pressure gauge.

The dual pressure gauges and shot counter display highlight the advanced functionality and positioning of the new Mozzafiato.

Steam and water taps.

The minimalistic, precise design of the redesigned water and steam taps reflects the Mozzafiato's coffee delivery performance, creating a cohesive look that extends across the Rocket product range.

Easter egg

As a testament to the attention to detail during the design process of the new Mozzafiato range, and a show of appreciation to our dedicated team, we've hidden a small "Easter egg" in the cup warmer area.

TECHNOLOGY

The new Mozzafiato R and Mozzafiato V are more than just beautiful design.

They introduce a range of new features and functions to ensure excellent results in the cup, quickly and effortlessly.

Engineered for Speed

The group head embodies strength, reliability and speed, with rapid heat-up technology, ensuring the first brew in as little as 12 minutes on average* from startup.

The machine now features a color-changing indicator that lets the user know when it is ready to go.

FAST
yet uncompromising.

Oled display

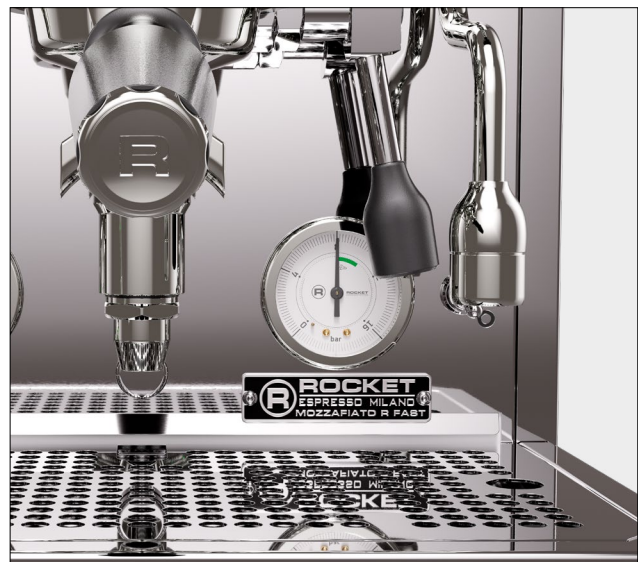

The new Mozzafiato machine is equipped with an OLED display that allows the user to:

1. View dispensing times
2. Manage a range of machine information and parameters (boiler temperature, unit temperature)
3. Monitor machine errors

Functions

Thanks to the new electronic system developed by Rocket, the new Mozzafiato range permits the user to regulate and manage:

1. The stand-by (energy saving) function (OFF or after 30 min, default 30 min)
2. Boiler working pressure with a degree-based adjustment (PID technology)
3. The sensitivity of the tank level probe (high 1 M Ω / medium 400 k Ω / low 150 k Ω , default low) – reserved for technician
4. The sensitivity of the boiler level probe (high 1 M Ω / medium 400 k Ω / low 150 k Ω , default low) – reserved for technician
5. The luminosity level of the RGB LED light (10%-20%-50%-100%, default 10%) – reserved for technician

There are three keys used for programming the machine positioned behind the drip tray. The machine is also equipped with a USB port, which may only be accessed by the technician by removing the side panel or cup warmer and is used to update the software.

*Depending on water temperature and external conditions

MOZZAFIATO R

FAST

MAIN FEATURES

System with heat exchanger

Tank reserve sensor

PID control

OLED display

Coffee unit with heating element

Dual pressure gauge

Boiler capacity: 1.8 litres

Programming keys

Boiler covering for energy saving

New ergonomic filter holder handle

Rotary pump

Dimensions: 314W × 457D × 409H mm

Water connection
or water tank

Weight: 30 Kg

Water tank capacity: 1.8 litres

Installed power: 1550 W

MOZZAFIATO V

FAST

MAIN FEATURES

System with heat exchanger

OLED display

PID control

Dual pressure gauge

Coffee unit with heating element

Programming keys

Boiler capacity: 1.8 litres

New ergonomic filter holder handle

Boiler covering for energy saving

Dimensions: 314W × 457D × 409H mm

Vibration pump

Weight: 27 Kg

Water tank capacity: 1.8 litres

Installed power: 1550 W

Tank reserve sensor
